

HE Space is a successful international space company. For 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. HE Space has joined forces with CS Group to lead the engineering and digital space market in Europe and to provide highly skilled consulting.

Design Engineer

Key Tasks and Responsibilities

As part of Airbus Defence and Space (AIR ST) you will have the following responsibilities:

- Ability to design structure components and assemblies that are optimized in terms of weight, cost, performance, production/assembly requirements while highest safety of the Product is assured using appropriate design tools;
- Ability to verify the compliance of a detailed design solution toward baseline of validated requirements for a single sub-system / equipment / component / module;
- This job requires an awareness of any potential compliance risks and a commitment to act with integrity, as the foundation for the Company's success, reputation and sustainable growth.

Skills & Experience

You will have the following qualifications and relevant experience:

- Bachelor's / Master's degree in Aerospace / Mechanical Engineering or similar field;
- At least 5 years of design experience in aerospace/space manufacturing;
- Detailed design knowledge of structural elements / components;
- VPM knowledge is desirable;
- Understanding of manufacturing processes and non-metallic materials is required;
- Self-reliant and systematic way of working;
- Independent working method and high quality awareness.
- Fluency in English is mandatory; knowledge of German would be an advantage.

This job is located in **Bremen**, Germany.
